DETAILED ACTION

Response to remarks

The response filed 6/14/07 presents remarks and arguments to the office action mailed 12/12/06. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Status of claims

Claims 1, 2-4, 9,12-13 and 16 have been amended.

Claims 1-4 and 8-17 are pending.

Claims 5-7 are cancelled.

Claim Objections

Claims 1,12 and 16 are objected to because of the following informalities: The periods in the claims at the part designations "a.", "b.", "c." and "d." are improper. There should be only one period in a claim. Appropriate correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 1614

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 and 8-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

There is no support for the range 35% to 65% as recited in the set claims above. There is support for 35-55%, 30-65%, see page 10 of the specification.

With regards to claim 16 and dependent claim 17, the phrase "brushing the teeth with a viscous slurry formed from a portion of said composition that is not deposited on the teeth" is new matter also. On page 6 of the specification states "The subjects thereafter expectorate the slurry created from the brushing". There is no support for the statement.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 1614

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

No claim is allowed.
